

Trends in Emergency Department Visits and Hospitalizations for Sickle Cell Disorders, 2018-2023

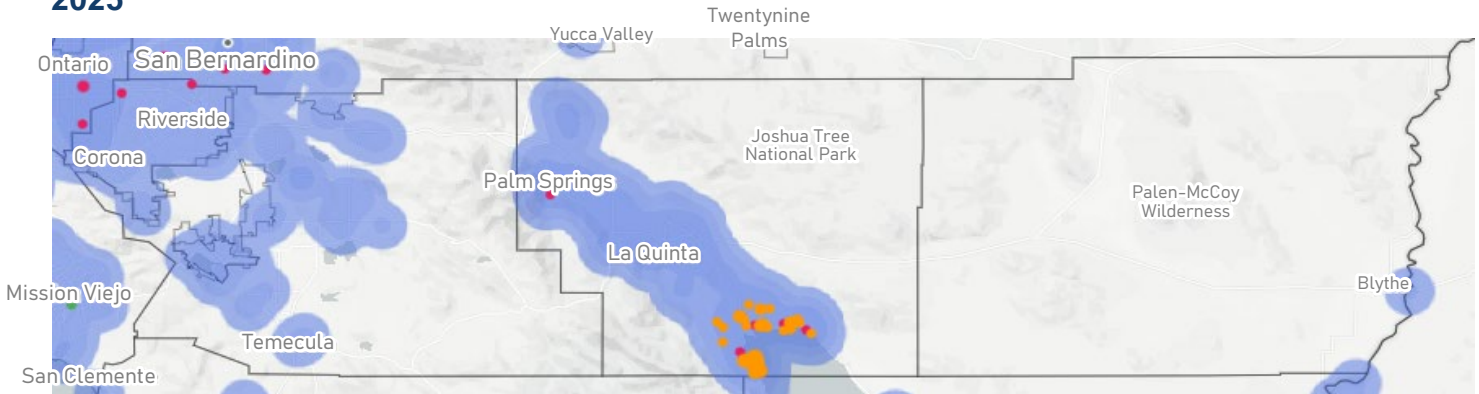

Source: California Department of Healthcare Access and Information (HCAI), 2018-2023. *2023 Data is the latest data

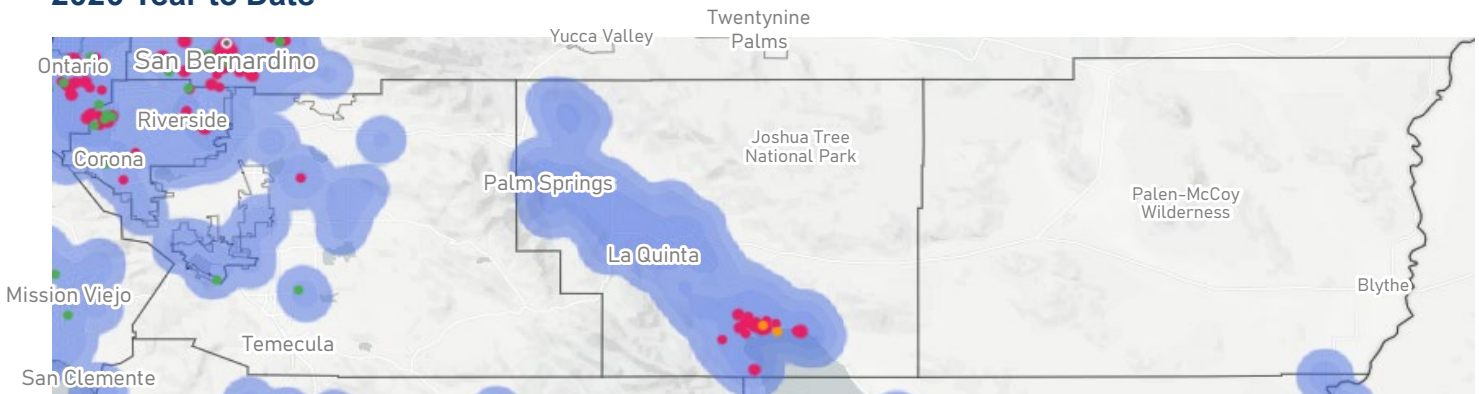

Notes: ED visits for sickle cell disorders fell sharply from 2018 to 2020, then leveled off around the low 300s through 2023. Hospitalizations remained relatively stable, declining in 2021 before rising again and nearly matching ED volumes by 2023.

More West Nile Virus Positive Mosquito Pools have been Detected in Riverside

2025

2026 Year to Date

■ WNV Mosquitoes

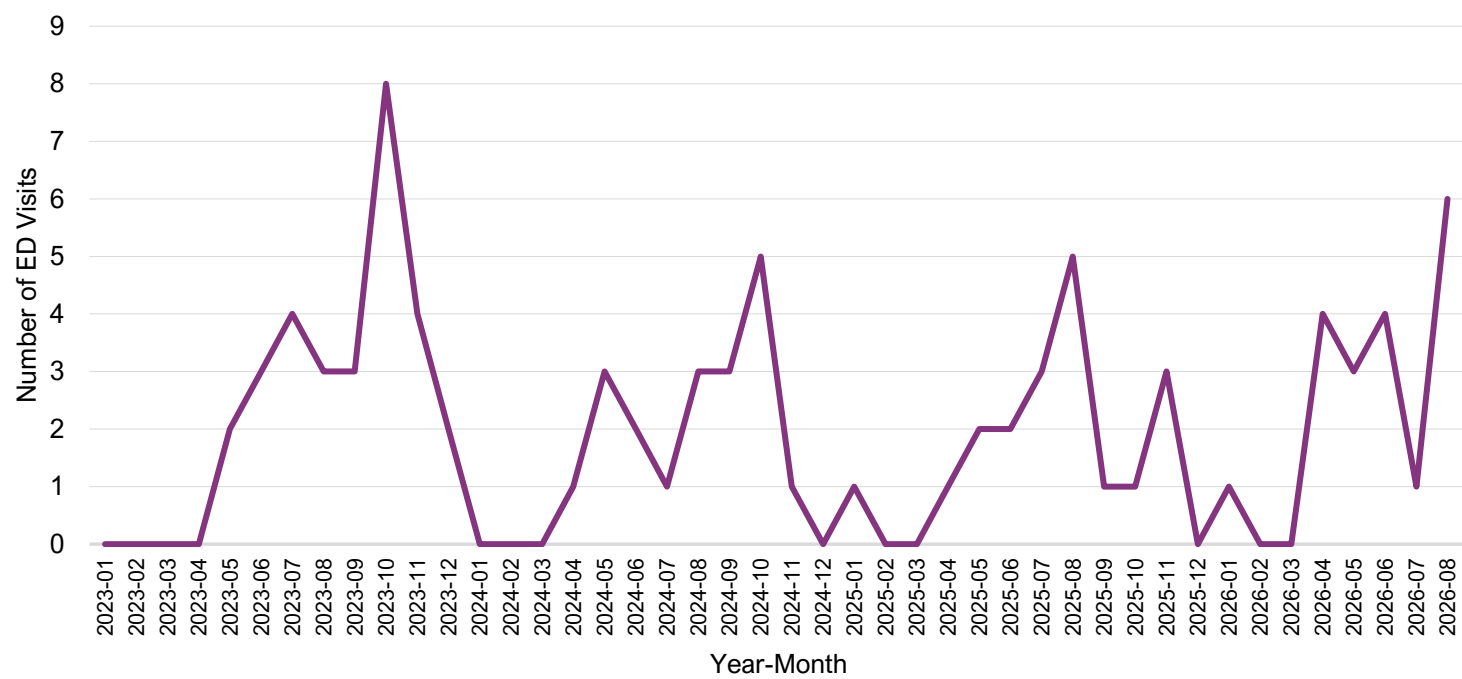

■ WNV Dead Birds

■ SLEV Mosquitoes

Source: VectorSurv, date accessed 9/22/2026 <https://maps.vectorsurv.org/arbo/>

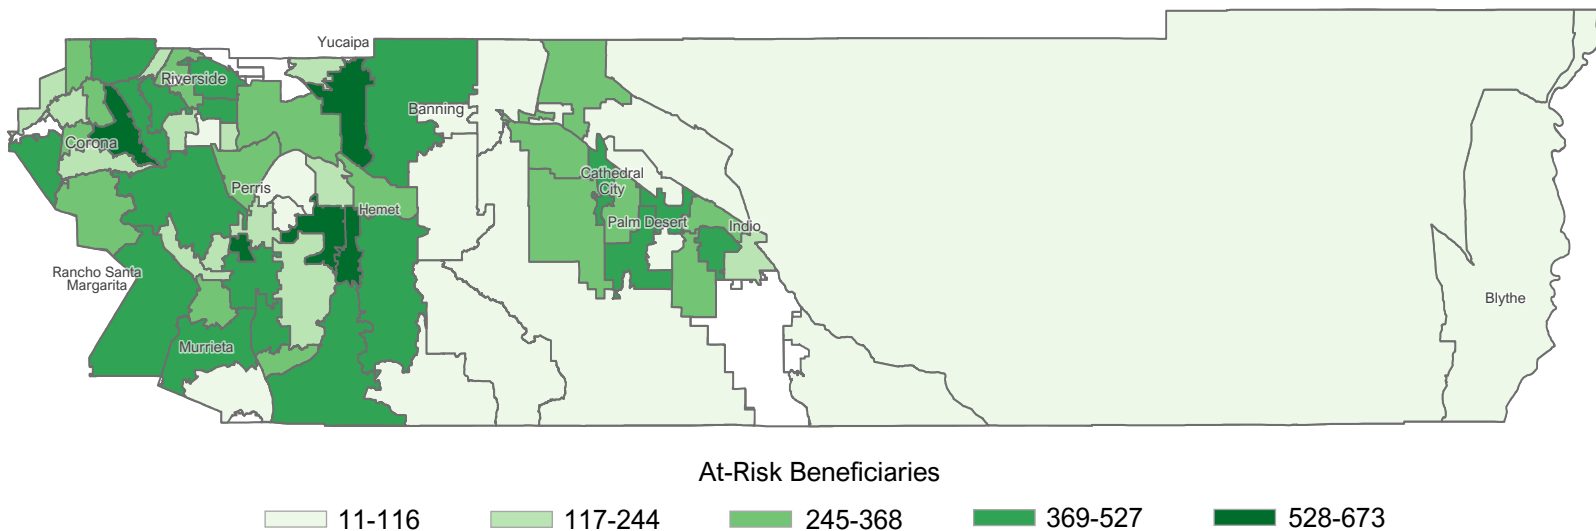

Notes: WNV = West Nile virus; SLEV = St. Louis encephalitis virus

The Number Of ED Visits Related to Snake Bites Peaks Each Year in Late Summer / Early Fall

Notes: Snake bites tend to have a seasonal peak each year. A slight increase in the number of bites in the Spring of 2026 may be due to the warmer temperatures experienced during this time period. Numbers include all snake bites - including, but not limited to non-venomous, pet, or wild snakes.

Over 19,000 Medicare Beneficiaries Depend on Electrical Medical Equipment in Riverside County

Source: HHS emPOWER Map, Electricity Dependend DM. <https://empowerprogram.hhs.gov/empowermap>

Notes: The U.S. Department of Health & Human Services emPOWER program tracks the number of Medicare beneficiaries by ZIP code who depend on electricity to power their medical and assistive equipment. These individuals are considered to be at risk during power outages. This map presents five-digit ZIP Code areas used by the U.S. Postal Service to deliver mail more effectively.
