Recovery Center

20521 Harvill Ave., Mead Valley

Opening January 2027

Recovery Center

The Mead Valley Wellness Village is proud to introduce its Recovery Center facility. Designed to provide a seamless continuum of care, the Recovery Center brings together urgent, crisis, and residential services under one roof. This integrated model ensures that individuals receive consistent, compassionate support from the moment they walk through the door.

At the heart of Recovery Center is a commitment to creating a healing environment rooted in dignity, stability, and community connection. Services include **Adult and Youth Behavioral Health Urgent Care**, a **Sobering Center**, **Adult Crisis Residential Treatment**, and **Residential Substance Use Disorder Treatment and Detox**.

Urgent, Crisis and Residential Services Under One Roof

The Recovery Center eliminates the gaps between levels of care by uniting urgent, crisis, and residential treatment services in a single location. Patients move seamlessly from immediate stabilization to longer-term recovery without the stress of transferring between disconnected facilities. This model results in faster response times, reduced trauma, and stronger outcomes.

Features & Programs

Adult and Youth Behavioral Health Urgent Care
Adult and Youth Behavioral Health Urgent Care is a walk-in crisis facility offering immediate access to mental health screening, stabilization, and psychiatric evaluation, all without an appointment. Staffed by multidisciplinary care teams, the center provides short-term crisis stays of up to 24 hours, ensuring individuals are safely stabilized before being connected to ongoing community-based services for continued support.

Sobering Center
The Sobering Center is a short-term, 24/7 care facility where individuals can safely recover from the acute effects of alcohol or drug use, with stays under 24 hours. This program focuses on immediate stabilization and safe recovery in a supportive, non-judgmental environment. Its primary goal is connecting each individual to ongoing community services for substance use treatment, mental health support, and long-term stabilization, all offered at the Wellness Village campus.

Adult Crisis Residential Treatment (CRT)
Adult Crisis Residential Treatment offers a short-term, voluntary alternative to psychiatric hospitalization for individuals navigating an acute mental health crisis. In a home-like setting with round-the-clock care, residents receive personalized support during stays of 14 to 30 days. CRT focuses on crisis stabilization, building daily living skills, and fostering meaningful connections to community resources empowering individuals to transition back to independent living with confidence and a clear path forward.

Residential Substance Use Disorder Treatment and Detox
Residential Substance Use Disorder Treatment is a non-institutional, 24-hour residential program offering up to 90 days of care for those experiencing substance use and/or co-occurring mental health challenges. The program addresses the behaviors and emotions underlying addiction through individual therapy, group therapy, and addiction education. The Recovery Center will offer detox services in a safe, medically supervised environment where individuals can clear addictive substances from their system while being supported through the withdrawal process. While detox is a critical first step in recovery, it addresses only the physical dependence on a substance. However, because the Wellness Village offers a seamless continuum of care under one roof, long-term addiction is addressed through on-site residential treatment, giving individuals a clear, uninterrupted path to lasting recovery.
