Growing Older Gracefully
Working with Our Community
In Keeping Everyone Safe.
Making a few simple adjustments in the home can help prevent injury

SIMPLE ADJUSTMENTS TO MAKE YOUR HOME SAFER

• Stairways should be well lit and have secured handrails on both sides of the stairs.

• Remove all tripping hazards around the home such as throw rugs, clutter, children’s toys, shoes and newspapers. Keep walkways and hallways clear.

• Put non-skid rugs on bathroom floors. This is probably the most dangerous room in the home because of hard surfaces, small spaces to maneuver, and water from showers and tubs.

• Make use of a shower chair or a transfer bench to assist in getting in and out of the bathtub.

• Use a toilet safety frame, commode or raised toilet seat. Install grab bars near toilet and shower/tub as a means of balance in getting on and off the toilet or in and out of the shower.

• Use a bed rail for getting in and out of bed. This is ideal for those who have had a stroke or hip surgery.

GROWING OLDER GRACEFULLY

Falls are Preventable!

• As people grow older the risks of falling become greater. Weakened leg muscles, limited dexterity, and impaired vision are just a few factors that can contribute to a fall which may result in injury or worse.

• Fall prevention and making the home safe is extremely important for small children and the elderly.

• Making a few simple adjustments in the home can help prevent falls and protect people from injury.

KEEPING ACTIVE IS PREVENTATIVE AND REDUCES RISKS OF FALLS

Activities help keep people pliable, flexible and young. It improves balance and increases mobility.

• Take a local yoga class, tai chi or stretching class.

• Swimming is an excellent way to stay fit and strong.

• Take a long walk every day to keep your motor running.

• Take up a hobby and enjoy life.
