Riverside University Health System – Public Health (RUHS – Public Health) and Health Assessment and Research for Communities (HARC) conducted a study in 2021 about COVID-19 needs among Riverside County adults. HARC collected data in English and Spanish from more than 9,200 randomly selected adults between September 2021 and November 2021. The survey asked questions about attitudes and behaviors towards COVID-19, as well as pandemic experiences and basic needs.

This project was supported by Epidemiology and Laboratory Capacity Enhancing Detection funds and is provided by the Centers for Disease Control and Prevention.

## Public Health

When asked to what extent the COVID-19 pandemic had impacted personal daily life, Riverside County residents reported "some" or "great" impact in the following areas.

**75%** of participants felt an impact in their social life/ relationships

**64%** of participants felt an impact in their work/school participation

On that the same question, Riverside County residents also reported "some" or "great" impact in the following areas.

**56%** of participants felt an impact on their mental health

**54%** of participants felt an impact on their economic situation

When asked to what extent the COVID-19 pandemic had impacted personal daily life, Riverside County residents reported "some" or "great" impact in the following areas.

**41%** of participants felt an impact on their physical health
