Riverside University Health System – Public Health (RUHS – Public Health) and Health Assessment and Research for Communities (HARC) conducted a study in 2021 about COVID-19 needs among Riverside County adults. HARC collected data in English and Spanish from more than 9,200 randomly selected adults between September 2021 and November 2021. The survey asked questions about attitudes and behaviors towards COVID-19, as well as pandemic experiences and basic needs.

This project was supported by Epidemiology and Laboratory Capacity Enhancing Detection funds and is provided by the Centers for Disease Control and Prevention.

Riverside County residents were asked if they had experienced any COVID-19 vaccine requirements in day to day life and were encouraged to select all that apply. Below are the most common responses.

61% have **not** experienced any
vaccine requirements.

24% of participants have experienced vaccine requirements at their work

11% of participants have experienced vaccine requirements with family

8% of participants have experienced vaccine requirements with friends

7% of participants have experienced vaccine requirements with school
